Rezazi Mohamed Abdelbasset

I am Rezazi Mohamed Abdelbasset Full Stack Developer. and Software engineer.

I am passionate about web and mobile standards and always seek opportunities to improve my skills and learn from others. I Have strong communication skills and strong attention to detail design as well as the value of code

WORK EXPERIENCE

02/2025 - 05/2025

Cevital SPA

Master 2 Graduation Project – Centralized Training Platform for Cevital Group

- Designed and developed a centralized training management platform for Cevital Group to streamline planning, tracking, and evaluation across 26 subsidiaries.
- Collaborated with HR and technical teams to analyze requirements, propose architecture, and implement a scalable solution aligned with enterprise needs.
- Integrated decision-support capabilities to enhance training effectiveness and support strategic HR planning through data-driven insights.

12/2023 - Current

DadyCar

Front-end Developer

- worked as a front-end developer in DadyCar where it's located in France with part-time
- I worked on a complex healthcare project where we created a platform that facilitated the process of Prenatal surgery for women by answering questions and according to those questions the result will be calculated automatically according to an algorithm, so when she goes to the doctor, he will see the result directly without asking her again
- worked on the fleet app which is a driver companion, it contains all the features drivers will need, some features will help the company like the data collection features, and some features will help the driver do his jobs like car sharing and different reservations in garages and services
- I worked on a garage app that efficiently manages a car garage by centralizing the management of services, appointments, leave, payments, invoices, quotes, suppliers, and vehicles.
- worked on redesigning the main website of the company

06/2025 - current (In weekend)

BrainerX

Web instructor

- Working as full stack web instructor where teach the students about the web
- The technologies during the training are:
- understanding how does web work and in
- Frontend technologies (HTML/CSS/Javascript/Dom/React)
- Backend technologies (Nodejs,ExpressJs,MongoDb,Authentication,Authorization)

06/2023 - 09/2023

Factory Digitale

Front-end Developer

- I worked as a front-end developer in factory digitale company for 3 months full-time.
- worked on two E-commerce dashboards related to two mobile applications different
- got a lot of experience in that job when I met many of the senior developers
